How to connect philips bluetooth speaker to laptop windows 10

1.Both the devices should have Bluetooth connectivity option I have Philips BT50 Bluetooth speaker and it works just fine when connected to my phone. [SOLVED] Connect Bluetooth Speaker To Laptop, Quickly & Easily! Streaming music from your phone to your Bluetooth speaker is quite easy. If you've ever wondered, "Can my laptop be connected to my Bluetooth speaker?" or "Can my laptop stream music to a Bluetooth speaker like my phone does?" or "Is it easy to connect my laptop to my Bluetooth speaker?", then you're in the right place. 1) On your keyboard, press the Windows logo key , and type network. Make sure your Bluetooth speaker is within the right distance (typically around 10 meters) from your laptop. Then click the link below that applies to you, to scroll to the instructions for your operating system. 2) On your computer keyboard, press the Windows logo key and type blue. You might also need to follow the on-screen instructions to complete the pairing process. You might also need to follow the on-screen instructions to complete the pairing process. But with the Pro version it takes just 2 clicks (and you get full support and a 30-day money back guarantee): 2) Run Driver Easy and click the Scan Now button. 3) Click Update All to automatically download and install the correct version of all the drivers that are missing or out of date on your system (this requires the Pro version - you'll be prompted to upgrade when you click Update All). If the problem still persists after using Driver Easy, please do not hesitate to send us an email at How to pair your Bluetooth device to a laptop / desktop computer Tip: Learn how to turn captions on or off when watching Internet videos from YouTube Step 1: Make sure your laptop / desktop computer has a Bluetooth module The first important step is to make sure the laptop / desktop has a Bluetooth module. Check the manual of your laptop / desktop on the availability of the Bluetooth module. Step 2: Put the device you want to connect to your computer into pairing mode By entering pairing mode, you make the device you want to connect to your laptop or desktop computer discoverable. The steps to enter pairing mode may vary depending on the device you want to connect (headphones, speakers, smartphone, etc. Example : The WH-1000XM4 wireless Bluetooth headset immediately goes into pairing mode when used for the first time. The WH-1000XM4 wireless Bluetooth headset immediately goes into pairing mode when used for the first time. Once you've found your product's page, click on [Help guide (Web manual)] and go to the section: Making connections – Computers. Example: This is the product page and the Help guide (Web manual) of the WH-1000XM4 wireless noise canceling headset. In the first tab [Options] you will see a [Discovery] section with the [Allow Bluetooth devices to find this PC] option. Check the [Allow Bluetooth devices to find this PC] option and click the [Apply] button at the bottom. Attention: Remember to turn OFF Airplane mode (Windows 10) Go to [Start]. On your Mac, choose Apple menu – System Preferences, then click Bluetooth. Alternatively, go the top menu bar and click on the Bluetooth icon if it is available. NOTE: In the case of the model WH-1000XM4, it is very important that you click on [WH-1000XM4] and not [LE_WH-1000XM4], which might appear in the list sooner than [WH-1000XM4] headphones, after putting them in pairing mode by pressing the [ON] button for 7 seconds. In the [Add a device] window, select the Bluetooth headset you want to connect. Depending on the model of your headphones or speakers, you might have to enter the pairing code. Finally, right-click on the sound icon in the taskbar to select [Playback devices]. If you have successfully put your speakers or headphones into pairing mode, they should appear in the Bluetooth list. Scroll down if you do not immediately see the device you want to connect in the list, as it might be hidden further down in the menu.
